ACT · LIC ACT Team 2 · ZIP 11101 · Veteran
F43.10 PTSD · F10.20 Alcohol use disorder

Act

Score 0.99

Tue, Jul 4, 9 PM · July 4, 2023 · Independence Day fireworks

Why flagged

6 noise complaints in ZIP 11101 in the last 2 hours (3.2x a usual night), mostly loud street noise +0.31

Noise · NYC 311

Fine particles at 128.5 µg/m³ (air quality index 204) +0.21

Air · EPA monitors

Crisis visit in the last 30 days +0.19

Patient · Client record

How sure we are

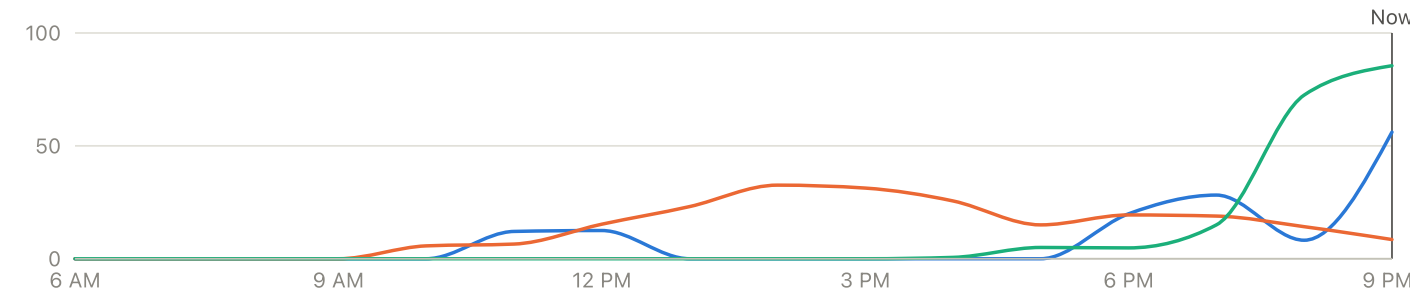

Low confidence

- Exposure is estimated for all of ZIP 11101, not this person's block
- Noise comes from 6 311 complaints, which lag and depend on who reports
- Air quality is from the nearest EPA monitor, 8.8 km away
- Contact details last updated 2022-06-14, over a year ago
- No pharmacy data: medication effects, such as SSRIs in heat, are not assessed

Conditions at ZIP 11101

Peaks today: Noise 56 · Heat 33 · Air 86

Noise Heat Air

Vitals Simulated

Heart rate 87 bpm against a usual 73. Variability 27 ms against 39. Restless sleep 48 minutes against 17.

Heart rate tracks noise today (r = 0.77). Simulated wearable data for the demo. Real deployments read a watch or phone the client connects.

What they told us

They told us: they name fireworks, sirens as triggers; what helps: noise-cancelling headphones, calling someone, a quiet room; support person: my sister Dana.

Next step

Follow the care team's plan: Tonight: stay indoors with headphones on until the fireworks end. If the grounding exercise does not help within 10 minutes, call the team line and we will call you back.

Their plan

- Tonight: stay indoors with headphones on until the fireworks end. If the grounding exercise does not help within 10 minutes, call the team line and we will call you back. (Dr. A. Rivera)
- Fireworks is one of the things you told us sets you off, and that's what's around you right now.
- Put your noise-cancelling headphones on before it gets loud. You told us they help.
- Call someone you trust and stay on the line for a while. You told us that helps.
- Move to your quiet room and keep the windows shut.
- Your quiet room away from the street is the best place to be right now.
- Let my sister Dana know how tonight is going.
- If home gets to be too much, the library on Jackson Ave is on your list of calmer places.
- Stay indoors with the windows closed while the air is bad.
- If you go out, wear a well-fitting mask (N95).
- Keep any prescribed inhaler with you.
